Professional Summary

Backend-focused Software Engineer with 9+ years of experience in Java and Spring Boot, delivering solutions across insurance and financial domains. Can also handle frontend work with HTML, CSS, JavaScript, and TypeScript. Familiar with Docker and have experience maintaining, debugging, and troubleshooting legacy systems. Always looking to learn new technologies to continuously improve my skills and apply them to build reliable and efficient software.

Education

- **King Mongkut's Institute Technology Ladkrabang** , Bachelor of Science , Computer Science. **2013-2017**

Work Experience

Java Developer at Muang Thai Life Assurance (MTL)

Full-Time | JUN 2023 - Present

Leading Thai life insurance company offering life, health, and accident coverage to customers across Thailand.

- **Online Sale Rule**
 - Optimized service performance, reducing response time — from ~10 seconds to under 1 second.
 - Maintained and enhanced the Business Rule services ensuring accuracy and stability for core business operations.
 - Developed an internal support web application enabling users to validate and inspect rule conditions, reducing reliance on the development team.
 - Provided UAT and production support, ensuring stable and reliable releases.
- **Lof4Claim**
 - Maintained and enhanced an enterprise-scale insurance claims system serving 100+ internal users, including bug fixes, feature improvements, and ongoing system stability.
 - Developed an internal web app enabling developers to query production data directly, removing dependency on the operations team for data patching and investigation.
 - Provided UAT and production support, ensuring stable and reliable releases.

Technical Consultant at MFEC Public Company Limited (MFEC)

Full-Time | JUN 2017 - MAY 2023

Leading Thai IT services company providing technology solutions and consulting to large enterprises across various industries.

- **API Gateway / API Management**
